VANKAYALA PAVANI

(+91) 7842114595 | pavanivankayala169@gmail.com | github.com/pavanivankayala | linkedin.com/in/vankayalapavani

PROFILE STATEMENT

Motivated Computer Science (AI & ML) undergraduate with a strong foundation in Python development, object-oriented programming (OOP), and data structures. Experienced in leveraging libraries like Pandas, NumPy, and Scikit-learn to build data-driven solutions and automate workflows. Adaptable fast-learner with a proven ability to write clean, efficient code and quickly master new frameworks. Seeking a Python Internship to contribute to real-world software applications and technical projects while collaborating with a dynamic development team.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering (AI & ML)
JK Lakshmipat University, Jaipur, Rajasthan
Batch: 2024–2028 (Graduating 2028) | Current Year: 2nd Year | CGPA: 8.03

TECHNICAL SKILLS

- **Programming Languages:** Python, C
- **Core CS Fundamentals:** Data Structures & Algorithms (DSA), Object-Oriented Problem-Solving, Complexity Analysis
- **Database:** SQL
- **Machine Learning:** Scikit-learn, Pandas, NumPy, Matplotlib, Deep Learning, MLOps, Vertex AI
- **Web Development:** HTML, CSS
- **Other Skills:** Problem-Solving, Analytical Thinking, Fast Learner, Clear Technical Communication, Self-Motivated

PROJECTS

AI-Based Active Motion Detection in Biological Systems *(2026)*
- Built a machine learning model to detect and classify active motion patterns in biological systems from vitals/sensor data using supervised learning algorithms.
- Handled data preprocessing, feature engineering, and model evaluation to improve detection accuracy and reliability.
- **Technologies:** Python, Scikit-learn, Pandas, NumPy, Matplotlib, Machine Learning

Health Risk Prediction Using Machine Learning *(FEB26)*
- Developed a Health Risk Prediction System to classify patients into Low Risk and High Risk categories using supervised machine learning algorithms.
- **Technologies:** Python, Scikit-learn, Pandas, NumPy, Matplotlib, Machine Learning

ElderCare AI *(JAN26)*
- Developed an APK application that predicts whether a user's health is at risk based on daily vitals, aimed at supporting elderly care.
- **Technologies:** HTML, CSS, Monad, Supabase

Password Generator *(NOV25)*
- Built a configurable password generator that creates secure passwords using combinations of letters, numbers, and symbols.
- **Technologies:** Python

CERTIFICATIONS & ACHIEVEMENTS

- Introduction to Data Science in Python — Coursera (JAN25)
- IndicWiki Indigenous Language Development — IIIT Hyderabad (MAY25)
- Mastering Generative AI and ChatGPT — GeeksforGeeks (JUN25)
- Database Management System — Infosys Springboard (NOV25)
- Machine Learning Operations (MLOps) for Generative AI — Google (JUN26)
- Artificial Intelligence Fundamentals — IBM (JUN26)
- Participant — Smart India Hackathon
